

# MILK PAINT

Introducing General Finishes 2014 color palette for Milk Paint, the popular high-tech acrylic furniture and project finish. You can mix it, lighten it, distress it, glaze it, layer different colors and antique it. It's perfect for unfinished furniture, upcycling or repurposing furniture. Available in 28 mixable colors.

Always test a small area first when going over other products to ensure the paint adheres well to the surface. Before you start, carefully read the directions on the back of the can. Test the color to ensure it's what you want.
